

## Absolute Yachts launches Generation 2022

### ABSOLUTE 60 FLY

Absolute Yachts has launched the new 60 Fly, part of the new Generation 2022 range for the Italian yard. The interior design features superyacht-style layouts. The master cabin is in the bow and raised from the lower deck with a high ceiling. There is a walk-in wardrobe, a vanity with a sea view and large side windows.

Absolute plans to install solar panels into the hard-top. At anchor, owner and guests can use solar energy to operate the essential services on board, without generators.

From the aft cockpit there are two staircases, ideal to reach the wide platform to enjoy a terrace just above the sea; the ample dimensions of the platform offer a comfortable entrance to the crew cabin, through the pantograph door concealed in the transom. A mooring station is available at the stern, which can be integrated in a dedicated cabinet in the cockpit on starboard side, equipped with joystick, bow thruster control and engines ignition panel.

Both helm stations on the main deck and flybridge have double piloting seats. From the main deck dashboard, a very wide windscreen, with minimised and rounded side support pillars, offers good visibility.

Absolute Yachts plans an official presentation to the public at the 2021 Cannes Yachting Festival this September. [absoluteyachts.com](http://absoluteyachts.com)
