

Absolute 56 Fly

Preskus Absolute 56 Fly, novega predstavnika italijanske ladjedelnice Absolute Yachts, smo opravili v biseru Istre, Rovinju. Kot je že poznano iz vseh njihovih predhodnih plovil, je tudi 56 Fly dobila poleg imena še vzdevek »karizma«. Karizma uteleša preizkušeno mešanico udobja in vrhunskega oblikovanja, pa tudi inovativnosti, funkcionalnosti in udobja na plovilu. Na kratko bi lahko zapisali, da gre za vse dobre lastnosti, ki smo jih že videli na predhodnih modelih. Revolucijo je začela 60 Fly in ta se nadaljuje v novo generacijo, imenovano 2022, pri kateri je poudarek na intuitivnem gibanju, kakovostnih pogojih v bivalnih prostorih, uporabi prosto stoječega pohištva in vrhunski izdelavi pohištva ter vgrajene opreme.

We tested Absolute 56 Fly, the new representative of the Italian shipyard Absolute Yachts, in the pearl of Istria, Rovinj. As is well known from all their previous boats, the 56 Fly has been given the nickname "Charisma" in addition to its name. "Charisma" embodies a proven blend of comfort and cutting-edge design, as well as innovation, functionality, and onboard comfort. In short, it is all the good qualities we have seen in previous models. The revolution started with the 60 Fly and continues into the new generation, called 2022, where the emphasis is on intuitive movement, quality living conditions, the use of free-standing furniture, and the top-quality craftsmanship of the furniture and fitted equipment.

Na hitro in površno bi lahko zapisali, da smo na 56-čveljski predstavnici opazili mnoge rešitve, ki so bile že videne na večji Absolute 60 Fly. A samo prenašati dobre rešitve med modeli ni dovolj in se preprosto ne izide. Pri Absolute Yachts skrbno načrtujejo sleherno plovilo in tudi pri Absolute 56 Fly, ki spada med njihove paradne konje, ni bilo nič drugače. 56-čveljska "Karizma" je nadgradnja prodajno zelo uspešnega modela z izboljšanimi številnimi podrobnostmi in nekaj novimi rešitvami. Odprt kokpit s prosto stoječim pohištvom bo pustil lastniku številne možnosti ureditve na prostem. Poveljniški mostiček ponuja tako ležalne površine kot udoben prostor za obedovanje in pripravo hrane. Na premcu je prostor za sprostitev z ležalnimi in sedalnimi oblažinjenimi površinami, glasbo in osvetlitvijo, da bodo trenutki, preživeti na plovilu, ostali nepozabni. Posebno premišljen je razpored v notranjosti, kjer lastnika čaka nadpovprečno velika in svetla kabina v premcu. Ladjedelnica Absolute je sicer znana po tem, da je uvedla izredno »bunkast« premec in ogromne steklene površine. Slednje ponujajo izjemno svetle prostore in dih jemajoče poglede iz notranjosti.

Flybridge Generation 2022

Udobje bivanja je povezano z lahkotnim in naravnim gibanjem na plovilu. Absolute 56 Fly nadaljuje revolucijo, ki se je začela že s predhodno generacijo, a je vsako leto izpopolnjena. Na krmi poveljniškega mostička tako najdemo prostor za prosto stoječe pohištvo ali ležalnike. Trda streha poveljniškega mostička ima vgrajene sončne celice, ki so postale dragocen vir električne energije za hotelske potrebe na plovilu. V svojem najljubšem zalivu bodo tako osnovni porabniki lahko delovali brez hrupa generatorja, obenem se bo po zaslugi manjše porabe energenta povečala avtonomija, da o hrupu in vibracijah zaradi generatorja niti ne izgubljam besed.

A quick and superficial note would be to say that 56 FLY, brings together and builds on the most successful features of previous boats. Most of them we have been seen on the larger Absolute 60 Fly. But just transferring good solutions between models is not enough and it just doesn't work. At Absolute Yachts, every boat is carefully designed and the Absolute 56 Fly, one of their flagships, was no different. The 56-foot "Charisma" is an upgrade of a very successful model with many details improved and a few new solutions. The open cockpit with free-standing furniture will leave the owner with a multitude of outdoor layout options. The flybridge offers both lounging areas and comfortable space for dining and food preparation. The bow has a relaxation area with lounging and seating cushions, entertainment, and lighting to make the moments spent on board unforgettable. The interior layout has been particularly well thought out, with an above-average sized and bright forward cabin awaiting the owner. Absolute is known for introducing an extremely large bow and huge glass areas. The latter offer exceptionally bright spaces and breathtaking views from the interior.

Flybridge Generation 2022

The comfort on board is linked to the easy and natural movement through different areas. The Absolute 56 Fly continues the revolution that started with the previous generation but has been refined every year. The aft part of the flybridge offers space for free-standing furniture or loungers. The solar panels built into the hard top become a valuable resource providing superior comfort when you stop in your favorite cove, reducing noise, vibrations, emissions, and consumption, and ensuring greater autonomy with a diesel generator.

Na premcu, na prostem, na palubi

Čeprav naziv »karizma« pomeni številne podrobnosti in močan značaj, je Absolute 56 Fly nadaljevanje preverjene zgodbe. Zato je na premcu prostor rezerviran za udobje, ki ga običajno v kombinaciji s sediščem z mizico in ležiščem najdemo na veliko večjih plovilih. Prehodi od premca do krme so dobro zaščiteni s čvrsto nerjavno ograjo. Obenem je tam, kjer so velika okna, oplata tako spuščena, da omogoča boljši pogled na okolico. Tudi sicer so oblikovne rešitve na oplati nad palubo razgibane, obenem pa uporabniku dopuščajo veliko več interakcije z okolico. Kokpit je na krmi zaprt z ograjo in steklenimi okni, ki zapirajo kabini za posadko na krmi. Ta prostor je lahko tudi skladiščni prostor za morske pripomočke, če posadke ne bomo potrebovali. A se vrnimo v kokpit, kjer bomo poljubno sestavili šest prostostoječih enosedov v poljubno obliko. Modularna oprema omogoča različne postavitve in lastni izbor elementov v kokpitu, kar lastniku daje še večjo možnost izbire pohištva in opreme. Iz kokpita bomo na ta način lahko spremljali dogajanje na kopalni ploščadi ali v notranjosti salona, kamor kokpit direktno komunicira in kjer je za drsnimi vrati kuhinjski kotiček. Krmna kopalna ploščad bo lahko gostila pomožni čoln ali vodni skuter, glede na njeno zmogljivost, 400 kilogramov, bo to postala absolutna zasebna plaža. Iz krmne ploščadi je preko kabin v krmi dostop do strojnice. Drugi dostop do tehničnega prostora za hiter pregled je iz kokpita. Na bočnem prehodu po desni strani bomo našli stranska vrata, skozi katera se dostopa do notranjega krmarskega mesta.

On the bow, outdoors, on deck

Although the title "charisma" implies many details and a strong character, the Absolute 56 Fly is the continuation of a tried and well-proved story. That's why space is reserved at the bow for the comfort usually found on much larger yachts, combined with a bench seat and a berth. The passages from bow to stern are well protected by a sturdy stainless steel railing. At the same time, where there are large windows, the planking is lowered to allow a better view of the surroundings. The design of the plating above the deck is also varied while allowing the user to interact much more with the surroundings. The cockpit is enclosed aft by a railing and a glass window that encloses the aft crew cabin. This space can also be a storage area for marine equipment if the crew is not needed. But let's go back to the cockpit, where we can arrange the six freestanding single seats in any shape we like. The modular design allows for different layouts and a choice of cockpit elements, giving the owner even more choice in furniture and fittings. From the cockpit, you can watch the action on the sundeck or inside the saloon, where the cockpit communicates directly and where there is a galley area behind the sliding doors. The aft bathing platform will be able to host an auxiliary boat or a jet ski and, given its 400 kg capacity, it will become an absolute private beach. From the aft platform, there is access to the engine room via the aft cabins. Second access to the technical area for a quick check is from the cockpit. On the starboard side passage, we will find a side door next to the console panel and a second helm station.

Notranjost

Čeprav je najlepše upravljati novi Absolute 56 Fly iz poveljniškega mostička, je drugo mesto za upravljanje v notranjosti, do koder lahko pridemo preko že omenjenega stranskega vhoda. Zaradi odlične ergonomije krmarskega mesta in velikih oken je upravljanje iz notranjosti prav tako učinkovito in varno, saj so tako kot na prostem upoštevani visoki standardi ladjedelnice. Tretje krmarsko mesto je na krmi, v kokpitu, in je predvideno za potrebe manevriranja v pristanišču in je seveda dobavljivo ob doplačilu. Močna osebnost modela Absolute 56 FLY se izraža v njegovih izrazitih linijah in notranjosti z udobnimi, prefinjenimi in zelo praktičnimi prostori. Osrednji prostor na palubi je v primerjavi s kuhinjsko nišo za stopničko višji salon. S tem smo dobili višino za dve kabini v osrednjem delu plovila, od katerih je ena VIP kabina in druga z ločenima ležiščema. Ta izredno pametna ureditev prostora pod palubo je omogočila, da se VIP kabina razteza čez celotno širino plovila in ima lastni toaletni prostor po vzoru superjaht v kabini. Med prednjo kabino, postavljeno nekoliko višje, in VIP kabino na krmi je umeščen še en prostor za goste ali morda otroke. Tretja kabina za goste je opremljena z ločenima ležiščema, pripada pa ji tudi toaletni prostor, ki je mišljen tudi za dnevno rabo. Lastnik bi predvideno kabino v premcu glede na udobje in velikost zlahka zamenjal z VIP kabino v krmi, a vendar je ta v premcu morda za odtenek bolj zaželena, saj skozi ogromna okna v trupu ponuja osupljiv razgled. Toaletni prostor je v prednji kabini porinjen povsem v premec ter opremljen z dolgo polico, kjer je umivalnik, na drugi strani pa prostor z ločeno prho. Lastniška kabina se bohoti z veliko garderobno omaro in številnimi oblikovnimi podrobnostmi, ki naredijo prostor izjemno eleganten in prefinjen. Kontrasti barv in izbor materialov so pika na i oblikovnim elementom in nezamenljivega italijanskega oblikovnega sloga. V notranjosti bomo našli številne prostore za shranjevanje, obenem si bomo lahko omislili pralno-sušilni stroj v dolgem hodniku s policami, do katerega se dostopa preko tretje kabine.

Interior

Although the best place to operate the new Absolute 56 Fly is from the flybridge, the second-best place to operate it is inside, which can be accessed via the aforementioned side entrance. The excellent ergonomics of the helm station and the large windows make operation from the interior just as efficient and safe, as the high standards of the shipyard are adhered to just as much as outdoors. The third helm station is located aft, in the cockpit, and is intended for maneuvering in port. The strong personality of the Absolute 56 FLY is reflected in its distinctive lines and interior with comfortable, refined and very practical spaces. The saloon is a step up from the galley. This gives us height for two cabins in the central part of the vessel, one of which is a VIP cabin and the other a twin cabin. This very clever arrangement of the space below deck has allowed the VIP cabin to extend across the entire width of the vessel and to have its own ensuite bathroom in the style of the superyachts in the cabin. Between the forward cabin, positioned slightly higher, and the aft VIP cabin is another space for guests or perhaps children. The third guest cabin is equipped with twin berths and also has a bathroom, which is intended for day use. The owner could easily have replaced the forward cabin with the VIP cabin in terms of comfort and size, but the forward cabin is perhaps a shade more desirable as it offers a stunning view through the huge windows in the hull. The bathroom area in the forward cabin is pushed completely forward and has a long shelf with a washbasin and a separate shower area on the other side. The owner's cabin boasts a large wardrobe and many design details that make the space look extremely elegant and sophisticated. The contrasting colours and choice of materials are the icing on the cake of the design elements and the unmistakable Italian design style. Inside, you will find numerous storage spaces, while you will be able to find the washer-dryer in the long corridor with shelves, which is accessed via the third cabin.

Osnovni podatki Short specification

Dolžina / LOA:	17,64 m
Širina / Width:	4,79 m
Voda / Fresh Water Capacity:	650 l
Gorivo / Fuel Capacity:	2,600 l
Največje število gostov / Max Passengers Capacity:	14
Motor / Engines:	2 × Volvo Penta D8-IPS800
Kategorija plovbe / Design Category:	8
